MPHIL ECONOMICS

The MPhil Economics is a 2-year, full-time programme that provides rigorous training in modern economics aimed at imparting a full range of knowledge, awareness and expertise in economics. The programme is designed to meet the emerging challenges of economies, as well as equipping students with the analytical tools necessary for policy-oriented research. It allows students to conduct supervised research into their chosen topic and produce a written thesis. The MPhil prepares students who wish to transition into the PhD(Economics) programme.

There is option for full-time, and weekend only

Students will take the following core courses:
