Overview
The course seeks to enhance the understanding and practice of monitoring and evaluating within the public sector development oriented Private Organizations. It starts by engaging participants to explore and appreciate the concept and application of ‘Monitoring’ and ‘Evaluation’ (M&E). Participants are then introduced to project management theory and its links with M&E. This will lay the foundation for participants to be equipped with various research methods and techniques, including statistical analysis techniques.

Course objectives
- To help participants explore and appreciate the meaning and application of Monitoring and Evaluation within the context of their working environment.
- To equip participants with the requisite knowledge and skills related to the Theory and Practice of Monitoring and Evaluation.
- To provide user-friendly approaches and tools to guide the effective tracking and reporting on various development interventions that can guide informed decisions and actions of various stakeholders in the development process.
- Produce highly trained personnel in M&E capable of tracking performance and distilling lessons to guide decision-making.
- Meet the demands and aspirations for continuing education of serving employees in public and private sector establishments.
- Reflect on current management skills, identify areas that need improvement, and utilize course resources to become a more effective manager.
